

Feel good doing the things you love!

Far too many of us face our daily lives with pain and stress that keeps us from doing the things we love. You deserve better and a daily hydromassage may be just what the doctor ordered.

Once considered only a device for use in medical centers around the world, hydromassage therapy is now finding enormous popularity in peoples homes. Hydromassage provides relief to people from all walks of life; the weekend athlete, the home gardener, the stressed executive, secretaries, waitresses, computer programmers, laborers, retired people and more. Virtually anyone can feel the need for a massage sooner or later.

Like a sponge that is squeezed, a tight muscle cannot hold much fluid. This decreases your circulation and increases the strain placed on your heart. This can leave you feeling fatigued and sore. Let the combination of heat and massage on a ComfortWave table relax your muscles and get you feeling your best!

In just 10 minutes on a ComfortWave...

- ✓ Your aches and pains will diminish.
- ✓ You'll move easier and with less pain.
- ✓ Your range of motion will improve.
- ✓ Your blood circulation will increase which keeps your body running better.
- ✓ You'll feel more relaxed.
- ✓ Your stress will just fade away.

If pain or stress are negatively affecting your life and preventing you from doing the things you love...

it's time to bring hydromassage home.

Q & A for the ComfortWave Model S-10

How much do your tables cost?

The ComfortWave costs \$2,499 plus shipping and sales tax where required.

How long does it take to get a table?

Once you place your order you will receive your table within two weeks.

How does the table get to my house?

The tables are shipped from the factory directly to your home by UPS.

Is the table hard to assemble?

It is very easy to assemble. The instructions that come with the table are well written and include pictures. If you have questions, call us at 800-330-7260 and we will guide you through the assembly process.

What is the warranty on the table?

One year factory parts warranty. If a part stops working during this time, just call 800-330-7260 and we will fix or replace the defective part free of charge. The tables have been designed so that anyone that can use a screwdriver can fix them.

What is your return policy?

Since our tables are somewhat expensive and come in special boxes, returns are difficult. Our policy reflects the challenges of canceling or returning this kind of product. Orders cancelled before being shipped that were paid by credit card will be charged a 4% fee. This fee covers the costs of processing your credit card initially. If a shipment is refused upon delivery or a return is initiated within 7 days after delivery, there will be a 15% restocking fee. We will not accept returns past 7 days from delivery. We will not accept returns for used or damaged items. All products must be sent back in the original packaging. Returns must be approved by Sidmar prior to sending anything back. If you have questions, please call 800-330-7260.

What are the electrical requirements?

115 volt, 13 amps (The tables will work on a standard 15 amp circuit but they should be on a dedicated 20 amp circuit.)

How do I prepare for the table arriving?

Find a place in your home that has enough power for the table and buy 22 gallons of distilled water. That's it.

What does it cost to operate the table?

To start, you should plug the cord into a wall outlet and leave it plugged in. This ensures the water remains heated and ready for your next use. The heater turns on and off automatically. When the heater is on, it draws the same power as one 150

watt light bulb. When you turn on the massage, the table draws 13 amps of power or about 1500 watts. If you pay .08¢ per kilowatt hour, that means it costs .12¢ for every hour the table is running. A typical 15 minute session would only cost .03¢.

Is ComfortWave the same as the Professional model?

The ComfortWave has all the power and features of the Professional model. Since you won't be running your table as often as a business, you don't need the internal radiator so this is the only part that is different.

Are the tables safe for everyone to use?

The tables provide a warm water massage so they are safe for nearly everyone to use. In general, people with heart or circulatory problems; phlebitis; skin infections or contagious diseases should get their doctor's approval prior to treatment. If you have questions, just ask your doctor.

Is there a limit to the size of the person that can use the tables?

The weight limits is 350 pounds.

Do you ever have to change the water?

The water in the mattress doesn't need to be changed but because of evaporation, you may need to add water periodically.

What maintenance is required?

All you need to do is add a water conditioner called Clar-Lub every 4 months, top off any evaporated water and launder the cloth cover as needed. Clar-Lub is available from Sidmar. You simply pour it into the water. It fights bacteria in the water and reduces particle build up inside the pump and jet system. Each shipment costs \$9.95 plus postage. That's only \$30 a year for maintenance.

What kind of payments do you take?

This answer can vary based on who you are buying the table from so it is best to ask them. Most of the time they will take cash, checks or credit cards. You could also get a loan from your bank.

Will my insurance pay for the table?

Most insurance carriers will not pay for the table. If you want to try, you will have to work with your doctor and insurance company. There really isn't anything Sidmar can do to help.

What if I have more questions?

Call us at 800-330-7260 or email your questions to info@sidmar.com. We are available Monday through Friday 8am to 5pm central time.
