Your hydrotable will work better and last longer if you add this water conditioner periodically.

From: Joe Holland

Re: Clar-Lub Conditioner for Hydromassage Table

Clar-Lub stands for clarifying lubricant and was specifically formulated for use in hydrotherapy tables. You simply shake the bottle and pour the entire contents into the water.

The conditioner...

- Lubricates all moving parts within the water.
- Prolongs the elasticity and life span of vinyl mattresses.
- Coagulates impurities and suspends them so they don't deposit on internal components and cause damage or slow the jets down.
- Suppresses the growth of algae.
- Helps manage water pH and alkalinity

Four fluid ounces treats containers up to 25 gallons of water. You will need to add additional conditioner on a periodic basis as the product breaks down over time. The more the table is used, the faster the conditioner breaks down and the more frequently you will have to add more.

Here is the recommended frequency:

- **If your hydromassage table is used in a business, add a bottle every 3 months.**
- **If your hydromassage table is used in your home, add a bottle every 4 months.**

This product has a shelf life so it is only packaged in single use, 4 oz bottles. No other sizes are available. The product costs \$9.95 plus postage and is only available from Sidmar.

We have a custom computer program that will remember when your table needs conditioner. We will automatically send you a bottle when it's time to add more so you don't have to remember. **Just call us at 800-330-7260 and we will set you up on automatic shipments.** Once you are on the automatic shipment program, we will take care of everything until you call us to cancel. There are no contracts and you are in complete control.
